

EXPERIENCES

of solo singing

CALL FOR RESEARCH PARTICIPANTS

We are conducting an online survey about experiences of solo singing. We'd love to hear from you if you:

- ✓ are over 18 years of age
- ✓ have sung solo (see more details below)

Queensland

Are you eligible?

For the purposes of this study, solo singing refers to a single voice either singing with or without an accompanying instrument or music, usually singing a familiar melody or improvising with words or syllables (or humming). This singing might occur at any time and in any place (such as the shower, car, park, or stage), may be addressed to someone (such as a child, spouse, or friend) or even to a group of people (as in performance), provided there is **only one person singing**. If you only sing with a group, (e.g. choir, community group etc) you are not eligible to complete this survey. If you only engage in individual meditational or devotional chanting, you are not eligible to complete the survey. You must be 18 years of age or over to participate.

How long will it take?

It is anticipated that it will take a minimum of 15 minutes to complete this survey. You are, however, free to spend as much or as little time as you wish on the tasks.

Please note that participation is entirely voluntary, and your decision whether to participate will not affect your relationship with the research team or their institutions.

If you would like more information before deciding on whether to participate, please see the full Participant Information Sheet [here](#).
